- Kickoff, June 03rd, hub:raum
- 3D-Hacknights every Wednesday
@RoofUP, Akazienstraße 3, 5-11pm
- Final presentation of results, July 16th,
@Tech Open Air

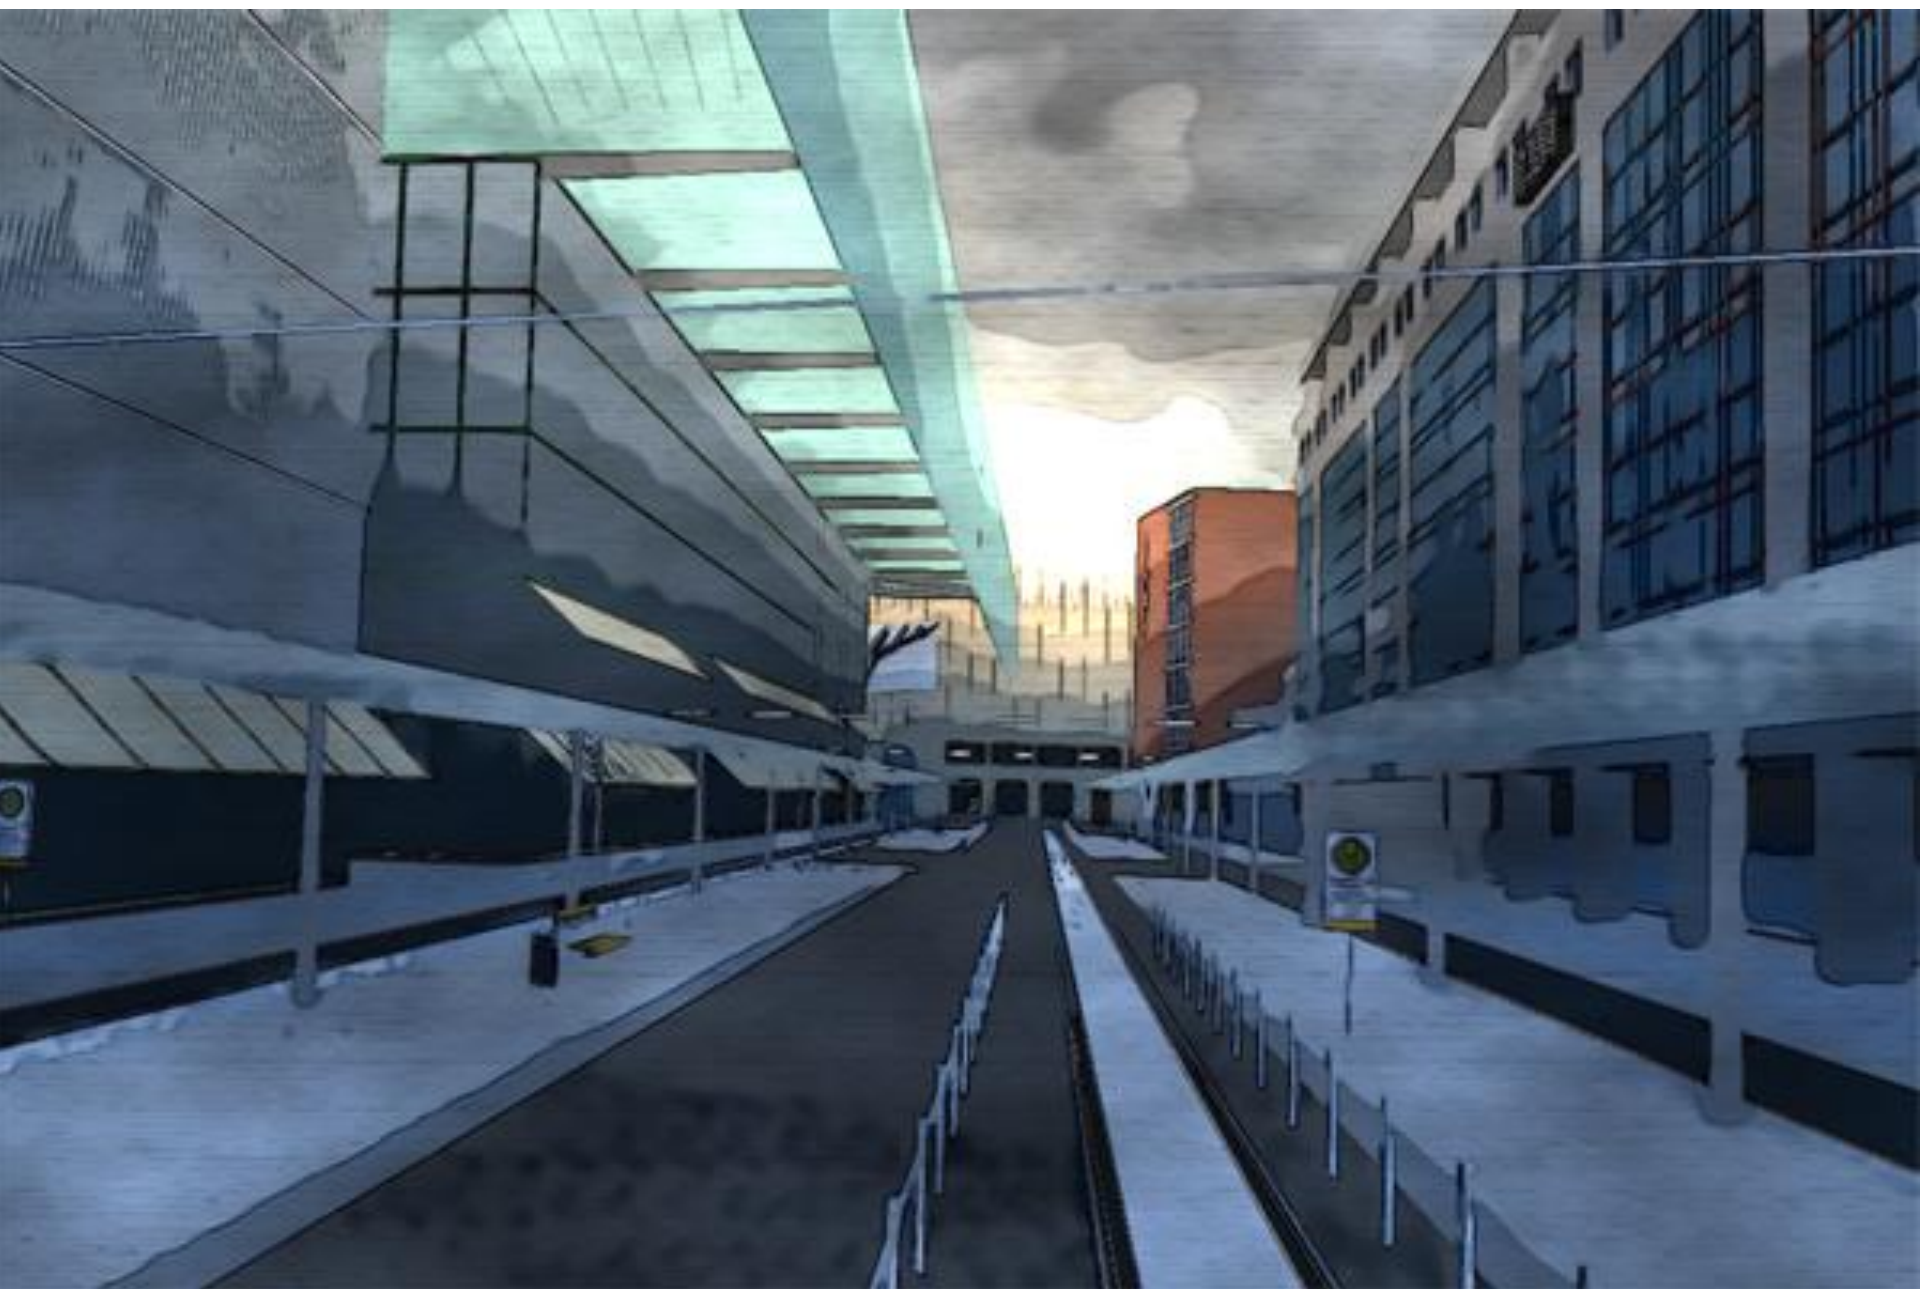

SunTherapy

Predicting sun exposure of Paris streets and cafés

By modeling how buildings block light throughout the day in Paris, we were able to predict sun exposure of cafés and streets, with an accuracy of a few meters. This was then used to create an app that helps people find a place to chill in the sun.
